## About Us

HalolT365, founded in 2025, is a modern, service-driven IT company based in South Africa. With over 20 years of combined experience in cloud computing, infrastructure, telephony, cybersecurity, and end-user support, we are passionate about delivering smart, scalable, and secure IT solutions.

Our diverse technical team and strategic partnerships allow us to provide enterprise-class technology with boutique-style care. We treat every client like a VIP, whether you need infrastructure design, cloud solutions, VoIP, or IT support. HalolT365 is your all-in-one technology partner.

## Our Core Values

- Integrity & Accountability – We deliver on our promises.
- Innovation – We stay ahead of the technology curve.
- Client-Centric Service – Your goals are our priority.
- Excellence in Execution – Every solution is handled with precision.

## Our Services

### On-Premise IT Infrastructure

- Windows Server setup, configuration, and upgrades
- Hyper-V & VMware environments, including upgrades and migrations
- Dell VxRail upgrades, maintenance, and scaling
- Network design & structured cabling projects
- Active Directory, DNS, DHCP, and Group Policy configuration
- Switch & firewall setup and management (Sophos, Fortinet, SonicWall, Ubiquiti)
- NAS/SAN deployment and storage consolidation
- Device procurement, staging, and imaging

### Cloud & Virtual Environments

- Azure virtual server deployments and management
- AWS and hybrid cloud environments
- Virtual network (VNet) design & VPN/Site-to-Site integration
- Microsoft 365 migration & administration
- SharePoint & OneDrive deployment with governance policies
- Azure AD, Intune, and device compliance management

- Cloud backup, replication, and disaster recovery strategies

### **VoIP & Communication Solutions**

- Hosted PBX solutions (3CX certified, Grandstream, Yeastar)
- SIP trunk provisioning and management
- VoIP handset setup and configuration
- Session Border Controller (SBC) deployments & integrations
- Microsoft Teams Direct Routing & telephony integration
- Call queues, IVRs, voicemail-to-email, and advanced call flows
- VoIP monitoring, troubleshooting, and call quality optimization

### **Cybersecurity & Compliance**

- Next-gen firewall deployment & configuration (Sophos, Fortinet, SonicWall)
- Advanced Antivirus/EDR rollout and monitoring
- VPN setup & secure access management
- Email security solutions (Mimecast-certified)
- POPIA, GDPR, and ITIL-aligned compliance consulting
- System vulnerability assessments & patching strategies
- Backup encryption & security hardening

### **IT Support & Maintenance**

- SLA and non-SLA managed services tailored to client needs
- Patch management & OS/application updates
- Proactive monitoring with RMM tools
- Tier 1–3 remote and onsite support
- Helpdesk ticketing system integration
- Onsite resources for basic support contracts without rigid SLAs

### **IT Consulting & Projects**

- Cloud migration planning & execution
- Office IT relocations & infrastructure rebuilds
- Technical scoping & documentation for IT projects
- Long-term IT strategy and digital transformation roadmaps

### **Hardware & Licensing**

- Supply of laptops, desktops, servers, and peripherals
- Networking equipment: firewalls, switches, cabling
- VoIP handsets, SBCs, and AV equipment
- Microsoft licensing & CSP partner licensing
- Third-party software licensing and renewals
